

Title: Flood Modeller
Location: Oxfordshire

About the role:

We are looking for a Flood Modeller to join a growing design consultancy and provide technical support to a range of clients in the UK with ongoing work available and excellent development opportunities for the right individual.

As a Flood Modeller you will be working on a range of residential, commercial and education projects and should be able to demonstrate experience in completing flood modelling on projects in these sectors.

Within the role of a Flood Modeller, it will be essential for the chosen individual to complete accurate flood modelling, risk assessments and sustainable drainage conception, and your input and contribution to the team are viewed as essential in the continued development of the business.

About you:

Candidates should have a minimum of 2 years experience working for UK-based design consultancies, and a background working on similar projects is desired in order to ensure a close match to the existing and upcoming workload.

In addition to having a confident, commercial and professional outlook you should have:

- Degree in Civil Engineering, Environmental Engineering, Hydrology or a related field
- Minimum of 2 years of UK-based experience
- Experience working with drainage design and flood risk assessments
- Experienced preparing sustainable drainage schemes
- Strong analytical, communication and technical design skills
- Excellent communication skills in both written and spoken English

Software required:

- TUFLOW
- Flood Modeller
- HEC-RAS
- InfoWorks ICM
- Microsoft Office Suite

About the business:

The company are an established design consultancy who have been working on UK-based projects across the last 50 years, and has built up a reputation for working on projects to a high level of detail and client satisfaction. This is an excellent opportunity to join their Oxfordshire office where their team continues to go from strength to strength and provide excellent design engineering services to their UK-based clients.

With a portfolio that includes residential, commercial and education projects of varying value and complexity, they have a wealth of experience and some exciting future projects that have led to them requiring another skilled and eager individual to join them as part of their business development.

Benefits package:

- Company pension
- 25 days holiday + Bank Holidays
- Death in service benefit
- Long service awards
- Flexible working
- Cycle to work scheme
- Interest free loan for annual travel season ticket
- Yearly flu vaccine
- Free eye tests and a contribution towards glasses
- Free on site parking
- Regular CPD seminars in house
